

RISK MANAGEMENT IN LABORATORIES

While Risk Management in the laboratory was introduced in the ISO 15189:2012 standards for medical testing laboratory, the concept and its utility in practice is still unclear to many. We anticipate that at the end of the workshop the participant will have an understanding of different types of risks and be equipped to carry out the process of risk management with the objective of improving accuracy and reliability and importantly preventing errors.

PROGRAM HIGHLIGHTS

- Highlights of risk in the new ISO 15189:2022 standard which has a major focus on Risk Management.
- Insights into risk analysis, prioritization and mitigation
- Examples of specific tools for situations faced in the laboratory
- Interactive sessions and group exercises to implement or improve risk management in your laboratories

WHO SHOULD ATTEND

Laboratory Administrators, Pathologists, Microbiologists, Biochemists, Quality Managers, Laboratory Risk Managers, Laboratory Managers, Laboratory Supervisors, Laboratory Technicians.
